**THE
WOW
EFFECT!**

FOR PROFESSIONALS
R

RefectoCil
Intense Brow[n]s™

Ash Brown

For lighter and natural looking results. A cool and ashy shade of brown that suits neutral and cold colour types well.

Chocolate Brown

For natural brunette results. A medium brown shade with a slight warm undertone. Recommended for neutral or warm skin types.

Deep Brown

For dark brown results. A particularly dark shade of brown, for striking and eye-catching looks. Especially recommended for gentle facial features and dark hair.

Black Brown

For almost black and intense results. The almost black shade gives the face a strong frame. Harmonious with black hair or to create contrast brows.

Optional Step

Intensifying Primer for a more intense make up effect and longer lasting results. The RefectoCil Intense Brow(n)s Intensifying Primer prepares the skin for even tinting. Choose the Intensifying Primer Medium for a softer skin staining effect or the Primer Strong for a very intense result.

FOR
BROWS &
LASHES

Base Gel . Step 1

Base Gel Deep Brown

15ml

The Intense Brow(n)s™ Base Gel is the first step for the tinting system to create impactful eyebrows and expressive eyelashes.

For dark brown results.

Base Gel Ash Brown

15ml

The Intense Brow(n)s™ Base Gel is the first step for the tinting system to create impactful eyebrows and expressive eyelashes.

For lighter and natural looking results.

Base Gel Black Brown

15ml

The Intense Brow(n)s™ Base Gel is the first step for the tinting system to create impactful eyebrows and expressive eyelashes.

For almost black and intense results.

Base Gel Chocolate Brown

15ml

The Intense Brow(n)s™ Base Gel is the first step for the tinting system to create impactful eyebrows and expressive eyelashes.

For natural brunette results.

Activator Gel

15ml

The final step! The Activator Gel contains Silver Nitrate that tints brows and lashes from deep within. Activator Gel lets the hair appear to be very dark, but this is not the final tinting result.

FOR
BROWS &
LASHES

Activator . Step 2

Micellar Eye Make-up Remover

150ml

Strengthens lashes and attracts eye make-up thanks to micellar technology „magnetically“. It cleans thoroughly – no rubbing!

Brow & Lash Foam

15ml

Moisturizing Aloe Vera. Suitable for all skin types, especially for sensitive skin, refreshes the skin, ideal pre-treatment before all Lash & Brow Stylings. The Brow & Lash Foam can also be used to cleanse the entire face. The special formulation refreshes the skin without drying it out!

Tint Remover, Intense Brow[n]s™

150ml

The perfect product to clean unwanted skin staining. And to create an ombre effect.

Browista Toolkit

2 brushes, 2 application dishes

The Kit contains two brushes that allow finest detail work and are equipped with a rubber spoolie. Two application dishes are also part of the set.

Precision Brow Tweezer & Brow Mapper

The tweezer is made of stainless steel and had an ergonomically perfect shape. It removes even the shortest and finest hair including the roots. The Brow Mapper allows precise brow mapping to give the eyebrows the ideal shape.

Saline Solution

15ml

For best possible results. Degreases and removes residues. Use before every lash & brow styling service.

Skin Protection Cream & Eye Mask

75ml

2 in 1! It protects the skin from stains and simultaneously acts as nourishing eye mask. With vitamin E, aloe vera, D-panthenol and almond oil.

Browista Palette & Ring

The Browista Palette & the Browista Ring allow hands-free brow & lash tinting for the first time! Both tools come with a marking for the ideal mixing ratio and 2 compartments where the brow & lash tint can be mixed simultaneously.

Application Set Mini

Includes five precise sticks with a pointed tip on the one side and a brush on the other side and five mini application dishes.

Silicone Pads

10 pcs.

The Silicone Pads prevent unwanted staining of the skin. They are self-adhesive - no cream is needed. The soft, impermeable high-tech silicone is antislip, skin-friendly and matches any eye shape. Easy to clean and reusable up to 100 times.

Eye Protection Papers Extra

96 pcs.

Extra soft and with special, impenetrable coating.

Essentials

- 04_Put on a towel**

Clean!

Lash & Brow Foam

- Nourishing Aloe Vera
- Suitable for all skin types, especially for sensitive skin
- Refreshes the skin
- Ideal pre-treatment before all Lash & Brow Stylings
- The Brow & Lash Foam can also be used to cleanse the entire face. The special formulation refreshes the skin without drying it out!

Micellar Eye make-up remover

Clean the eye area with RefectoCil Micellar Eye Makeup Remover. Also if the customer does not wear make-up, as the skin must be completely clean and fat-free.

Do not use a conventional eye makeup remover, as this may contain oil.

The micellar eye make-up remover magnetically attracts make-up. The best thing about it: The formula has a lash & brow strengthening effect!

Saline Solution

- Removes oils and residues.
- Also suitable for cleaning brushes and mini cosmetic trays.
- This step is especially important to get a perfect result.
- Put a few drops of RefectoCil Saline Solution on a cotton pad and gently wipe over the eyelids, eyelashes and eyebrows.

Tip

Inform the customer that the eyebrows & lashes are now also intensively cared for and strengthened. This gives the feeling of personal appreciation.

CUSTOMER FILE

The perfect shape

- a) Beginning of the eyebrow
- b) Highest point of the eyebrow
- c) End of the eyebrow

The perfect shape

In order to create a type-appropriate look, various factors play an important role. Each face has its own texture. Recognizing and taking into account individual needs is essential for Brow & Lash Styling and you as a Browista.

1. First determine the basic shape of the eyebrows according to the golden ratio with the 2/3 – 1/3 rule → Brow Mapping
2. Additionally adjust the eyebrows and eyelashes to the individual face and eye shape.

Brow Mapping

Brow mapping involves measuring the eyebrows using a number of fixed points. The aim is to define an even and symmetrical shape. It serves as a basis for finding a brow shape that flatters the shape of the face. Brow Mapping is an aid in shaping and tinting the eyebrows and also helps in client counselling, because the client can view the drawn shape in advance and express her wishes.

In **Basic Brow Mapping**, the eyebrows are measured using three fixed points.

To be used on:

- Clients with well-shaped eyebrows, where hardly any change in shape is necessary.
- Regular clients, for regular control of the shape.

In **Advanced Brow Mapping**, the eyebrows are completely measured with the help of a coloured thread and individual fixed points, so that a kind of template is created for the subsequent colouring or shaping of the brows.

To be used on:

- New clients, for a detailed analysis of the current situation and definition of the next steps.
- Clients with inappropriate/strongly asymmetrical eyebrow shape.
- Need to remodel the shape.

Face shapes

Oval

one and a half times as long as wide

Features: Widest spot on the cheekbones, hairline and chin are gently rounded.

Eyebrow shape as desired.

Heart-shaped

wide at the top, narrow at the bottom

Features: The forehead is the widest part, very high cheekbones, rather pointed chin.

A short and soft brow shape takes the focus away from the pointed chin. A high brow arch has a balancing effect.

Round

rather short in relation to width
Features: Round forehead and chin area, wide and full cheekbones.

The face can be visually lengthened by shaping the brow into a high arch.

Our face shape determines which hair and eyebrow styling, and also which glasses, suits us best.

The right eyebrow shape gives the six most common face shapes the best possible appearance!

Face shapes

Long

higher than wide

Features: The forehead looks high, the chin long. The cheek area is rather flat.

A rather flat brow lets the face appear wider and shorter.

Square

almost as long as wide, very distinctive

Features: Wide forehead and wide, angular lower jaw.

A high, rounded brow arch visually ensures soft contours.

Triangular

narrow at the top, wide at the bottom

Features: eyes and forehead narrowly pronounced, pronounced chin area;

A dense, flatter and shortened brow is ideal to take the focus off the chin and make it look softer.

Eye shapes

Determine the eye shape of your customer and adapt the service to the shape to achieve a harmonious and type-appropriate look.
The ideal distance between the eyes is the size of one eye.

Wide set eyes

Characteristics

The distance between the eyes is greater than the length of one eye.

Optical balance

Eyelashes: Emphasise the eyelashes in the first two thirds and lift them strongly. This helps to visually reduce the distance between the eyes.

Eyebrows: To further reduce the distance, the eyebrows may be slightly closer together.

Narrow eyes

Characteristics

The distance between the eyes is smaller than the length of one eye.

Optical compensation

An ombré brow look is recommended for narrow eyes. The beginning (1/3) of the brow may be coloured 2-3 shades lighter than the remaining 2/3. This visually lengthens the distance between the eyes.

Eye shapes

Almond shaped

Optical compensation

In this case, no optical balance is necessary and you can give free rein to your creativity in eyebrow and eyelash styling.

Rising

Optical compensation

Eyebrows: shape the brow rather straight. A high brow arch would further emphasize the outer corner of the eye.

Dropping

Optical compensation

Eyebrows: A high and accentuated brow arch raises the outer corner of the eye.

Sickel-shaped

Optical compensation

Eyebrows: A rather narrow brow helps to raise the area optically.

Hooded

Optical compensation

Eyebrows: A rather narrow brow also helps to raise the area visually. A wide eyebrow, would push the eye down.

Round

Optical compensation

Eyebrows: flat and elongated brows provide an optical extension of the eye.

RefectoCil Intense Brow[n]s™

The perfect colour

When choosing the right RefectoCil color, pay attention to the hair color, skin type and style of your customer. It is important to create a connection between eyebrows and hair to achieve a harmonious overall impression.

Eyebrows should always reflect an accent of hair color.

Tips:

- Suitable for the **skin type**.
- For **very light hair colors**, it is advisable to dye the eyebrows **1-2 shades darker** so that the face gets a beautiful frame.
- With **black hair and strong facial features**, the eyebrows can be tinted a shade lighter, so that the look becomes softer.

RefectoCil
Intense Brow[n]s™

THE SERVICE

- Techniques

FOR PROFESSIONALS
R

RefectoCil
Intense Brow[n]s™

**FULL
BROW
TECHNIQUE**

**OMBRÉ
SHADING
TECHNIQUE**

**BROW
FILLING
TECHNIQUE**

FULL BROW TECHNIQUE

The Full Brow Technique is the basic application that ensures a smooth and full-surface color build-up on the skin and hair. For a particularly intense look

Ideal for: Customers who want a strong effect or where a remodeling of the eyebrow is necessary, e.g. hairs are missing.

RefectoCil Intense Brow[n]s™

Cleaning

Clean eyebrows before tinting using the **RefectoCil Micellar Eye Make-up Remover** (or **RefectoCil Brow & Lash Foam**) and **RefectoCil Saline Solution**. If the skin is very dry, exfoliate the eyebrow area with a soft peeling product (e.g. **MasterLin Facial Peeling**)

Mapping

Measure the perfect brow shape with the **RefectoCil Brow Mapper**.
Start of eyebrow: Don't hold the brush to the outer edge of the nose, but to the nostril: This is where the eyebrow begins.

Mapping

Beginning of arch: Hold the brush at an angle across the eye, through the outer edge of the pupil: This is where the arch begins.

Mapping

End of eyebrow: Hold the pen at an angle from the nostril to the outer corner of the eye: This is where the eyebrow ends.

03

INTENSIFYING

Mapping

Connect the lines and draw a frame in the desired shape of the brows.

For the most precise shape, use the advanced Brow Mapping method.

Primer

Choose the product according to the skin type. Open the **Intensifying Primer** and put a pea-sized amount into one of the cosmetic dishes. Apply the **Intensifying Primer** to the eyebrows and skin with the RefectoCil cosmetic brush. **Application time: 4 minutes.**

Remove

Remove the **RefectoCil Intense Brow[n]s Intensifying Primer** using a dry cotton swab.

Wait!

Important: Let the brows dry for **4 minutes** before the next step! To achieve best results the brows have to be dry before the next step.

Base Gel

Use a clean brush. Select the desired colour. Open the **Base Gel (Step 1)** and squeeze a pea-sized amount of it into a clean cosmetic dish. Apply the **Base Gel** to brows & skin evenly in the direction of hair growth. **Application time: 2 minutes!**

Remove

Remove **Base Gel** using a dry cotton swab.

Wait!

Important: Let the brows dry for **4 minutes** before the next step.

Activator Gel

Use a clean brush. Open the **Activator Gel (Step 2)**. Squeeze a pea-sized amount of the **Activator Gel** into a clean cosmetic dish and apply the Activator Gel to brows & skin. **Start brushing at the end of the brow.**

Activator Gel

Continue to the middle and front part. Work very precisely.

Application time: 1 minute
(Activator Gel lets the hair appear to be very dark, but this is not the final tinting result)

Activator Gel

If needed: Use a little bit of RefectoCil Skin Protection Cream & Eye Mask to correct the brow shape.

Remove

Remove Activator Gel with a wet cotton pad.

Final Touch

Remove any unwanted stains using a dry cotton swab with the **RefectoCil Intense Brow[n]s Tint Remover**. Use the **RefectoCil Intense Brow[n]s Tint Remover** to correct the shape of the brows if needed or to remove tint spots.

Shape

Now you can shape the brows with the **RefectoCil Precision Brow Tweezer**.

Care

Apply the **RefectoCil Styling Gel** to nourish the eyebrow hair and provide shine.

Care

Info - In the salon:
For hygienic reasons it is important not to use the same brush on all customers.
Remove the **Styling Gel** from the tube with a clean RefectoCil brush and apply it with the rubber spoolie.

Effect

Full Brow Look

OMBRÉ SHADING TECHNIQUE

The Ombre Shading Tequique ensures a wonderful and gentle color gradient. The eyebrow is intensely emphasized in the back, while it becomes brighter in the front third, providing a very natural, feathery-light look.

Ideal for: Customers who want a natural look and where no remodeling of the eyebrows is necessary.

03_

INTENSIFYING

Repeat!

The Ombré Shading differs from the Full Brow technique in the way the **Activator Gel** is applied. Therefore, repeat steps 1-8 of the Full Brow technique.

Activator Gel

Use a clean brush. Open the **Activator Gel (Step 2)**. Squeeze a pea-sized amount of the **Activator Gel** into a clean cosmetic dish and apply the Activator Gel to brows & skin. **Start brushing at the end of the brow.**

Activator Gel

Continue to the middle and front part. Work very precisely. **Application time: 1 minute** (Activator Gel lets the hair appear to be very dark, but this is not the final tinting result)

Use rubber spoolie

In the front area of the eyebrow, apply the **Activator Gel** with the spoolie and be careful not to touch the entire surface of the skin. **Application time: 1 minute**

Use rubber spoolie!

In the front area of the eyebrows, focus on the hairs instead of the skin. Slightly brush the eyebrows to create a smooth effect.

10

Remove

Remove Activator Gel with a wet cotton pad. Remove any unwanted stains or correct the shape with **RefectoCil Intense Brow[n]s Tint Remover**.

Now you can shape the brows. Apply the **RefectoCil Styling Gel** to nourish the eyebrow hair and provide shine

WOW!

Effect

Ombre Shading Look

BROW FILLING TECHNIQUE

The Brow Filling Technique provides a gently restrained effect. Here, the front area of the eyebrow is completely omitted and not coloured. The transition between colour and natural hair, is worked out with the rubber spoolie.

Ideal for: Customers who naturally have particularly dense, dark and intense eyebrows but want more contour and definition.

03_

INTENSIFYING

RefectoCil
Intense Brow[n]s™

Cleaning

Clean eyebrows before tinting using the **RefectoCil Micellar Eye Make-up Remover** (or **RefectoCil Brow & Lash Foam**) and **RefectoCil Saline Solution**. If the skin is very dry, exfoliate the eyebrow area with a soft peeling product (e.g. **MasterLin Facial Peeling**)

Mapping

Measure the eyebrows according to the 3 point method, see Full Brow Technique. Connect the lines into a frame.

Mapping

Leave out the front third and draw a boundary line if necessary.

Mapping

The front area is not being tinted to create a very soft and natural make up effect. The next steps are applied only in the marked frame.

03 _

INTENSIFYING

RefectoCil
Intense Brow[n]s™

Intensifying Primer

Choose the product according to the skin type. Open the **Intensifying Primer** and put a pea-sized amount into one of the cosmetic dishes. Apply it to brows and skin only in the measured template.

Application time: 4 minutes.

Remove

Remove the **RefectoCil Intense Brow[n]s Intensifying Primer** using a dry cotton swab.

Wait!

Important: Let the brows dry for **4 minutes** before the next step! To achieve best results the brows have to be dry before the next step.

Base Gel

Use a clean brush. Select the desired colour. Open the **Base Gel (Step 1)** and squeeze a pea-sized amount of it into a clean cosmetic dish. Apply the **Base Gel** to brows & skin evenly in the direction of hair growth.

Application time: 2 minutes!

03

INTENSIFYING

RefectoCil
Intense Brow[n]s™

Remove

Remove **Base Gel** using a dry cotton swab.

Wait!

Important: Let the brows dry for **4 minutes** before the next step.

Activator Gel

Use a clean brush. Open the **Activator Gel (Step 2)**. Squeeze a pea-sized amount of the **Activator Gel** into a clean cosmetic dish and apply the Activator Gel to brows & skin. **Start brushing at the end of the brow.**

Activator Gel

Continue to the middle last part of the template. Work very precisely. **Application time: 1 minute**

03

INTENSIFYING

The transition

In the front area of the template, use the spoolie and brush a little beyond the boundary line to create a smooth transition to the untreated hairs.

Remove

Remove Activator Gel with a wet cotton pad.

Final touch

Remove any unwanted stains using a dry cotton swab with the RefectoCil Intense Brow[n]s Tint Remover. Use the RefectoCil Intense Brow[n]s Tint Remover to correct the shape of the brows if needed or to remove tint spots.

Effect

Brow Filling Look

LASH TINTING

Eyelashes can also be dyed with RefectoCil Intense Browns. **No primer is needed for this, as no skin coloration is necessary.**

Start the application with the Base Gel. Due to the herbal ingredients, Intense Browns is particularly suitable for sensitive customers and customers that usually tend to feel uncomfortable during lash tinting.

1

Clean

First remove contact lenses. Clean eyelashes before tinting using the **RefectoCil Micellar Eye Make-up Remover** (or **RefectoCil Brow & Lash Foam**) and **RefectoCil Saline Solution**.

2

Eye Care Pads

Now apply the **RefectoCil Silicone Pads** or the **RefectoCil Eye Care Pads** to protect the skin against unwanted tint stains.

3a

Skin Protection

Use a pea-sized amount of **RefectoCil skin protection cream & eye mask**. The oily formula protects the skin from unwanted staining.

3b

Skin Protection

Apply the **RefectoCil Skin Protection Cream and Eye Mask** to the upper eyelid.

03

INTENSIFYING

Base Gel

Open the **Base Gel (Step 1)** and squeeze a pea-sized amount into a clean **RefectoCil cosmetic dish**.

Application time: 2 minutes!

Remove

Remove **Base Gel** using a dry cotton swab.

Wait!

Important: For most intense and perfect results, let the lashes dry for **4 minutes** before the next step.

Activator Gel

Open the **Activator Gel (Step 2)**. Squeeze a pea-sized amount of the **Activator Gel** into a clean cosmetic dish and apply the **Activator Gel** to the lashes. Work very precisely to avoid tint stains on the skin.

Application time: 1 minute!

RefectoCil
Intense Brow[n]s™

Remove

Remove **Activator Gel** using a wet cotton pad and any unwanted stains using a dry cotton swab with the **RefectoCil Intense Brow[n]s Tint Remover**.

Care

Apply the **RefectoCil Styling Gel** to nourish the eyebrow hair and provide shine.

Care

Info - In the salon:
For hygienic reasons it is important not to use the same brush on all customers. Remove the **Styling Gel** from the tube with a clean **RefectoCil brush** and apply it with the rubber spoolie.

Effect

Accentuated lashes, the frame for the eye!

03

INTENSIFYING

First colour, then shape!

The removal of hairs must always be the last step of the treatment. After hair removal, the hair follicles are exposed. Eyebrow colour, bleaching paste or the Brow Lamination active ingredients could penetrate the follicles and cause inflammation or intolerance.

This does not apply to the RefectoCil care products. These can also be applied as usual after hair removal.

Tweeze

Place the tip of the **tweezers** on the hair. Hold the tweezers as close as possible to the hairline.

Always pull out the eyebrow hairs in the direction of hair growth. This prevents the hairs from breaking off and possibly growing into the skin.

Caution

The upper edge of the eyebrows follows the ideal, natural line. Do not remove any hairs here, or only those that no longer belong to this shape.

Final touch

Keep brushing the hairs upwards to control the shape.

Care package for home use

The dream team for long, shiny eyelashes & full, healthy eyebrows!

Day care Styling Gel

- Colour protection thanks to the unique Colour-Protect formula
- Care with D-Panthenol
- Styling: Unruly hair is fixed in the desired position
